PREREQUISITE: NONE

COURSE CODE: AWR-147

COURSE OUTLINE: Because most freight rail traffic traverses rural areas, it is important that rural responders, especially those in resource-limited areas, understand the dangers and unique hazards that rail car incidents present. This eight hour awareness-level course is designed to increase the knowledge of first responders in recognizing and characterizing the different types of rail cars, potential leaks, and courses of action to be taken based on initial site assessment. The course will increase participants' knowledge of safety and hazardous conditions that may exist at the scene, and will allow them to become familiar with safe practices adopted by the railroad industry.
